DETAILED ACTION

The response filed **August 21, 2006** presents remarks and arguments to the office action mailed **June 28, 2006**. Examiner notes the inconsistency between the claims as filed on August 21, 2006 and the remarks to the extent that claims 1-10 and 63 have not been identified as cancelled on the claim sheet. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments, filed, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Status of claims

Claims 1-10 and 63 are cancelled.

New claims 64-71 are pending.

Claim Rejections - 35 USC § 112

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1614

Claims 64-71 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants' request for reconsideration based on the fact that claims 1-10 and 63 have been cancelled would render the newly submitted claims 64-71 free of the rejection.

In response, even though Applicant has overcome the rejection based on scope, the written rejection still remains because as stated in the office action of record, the specification does show that Applicant is in possession of a wide variety of synthetic retinoid known to man and yet to be made for example.

In order to overcome this rejection Applicant is advised to replace the broad generic terms used in the claims with more specific compounds of the claimed invention.

Example in place of synthetic retinoids, Applicant may want to replace it with tretinoin, and non-denatured soybean extract with soymilk.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1614

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

No claim is allowed.
